

CHEETAH® XPLORE

Cheetah Xplore is a unique crossover foot prosthesis inspired by the original Cheetah design. Although primarily designed for everyday use, Cheetah Xplore allows the user to engage in various sports and activities. The foot combines high energy return and dynamic push-off with increased balance and stability, supporting amputees with an active lifestyle.

Used to cover the composite foot module to protect the foot and eliminate noise between foot module and foot shell.

Part#	Size
FCE63007	28-30

ELATION®

Changing shoes to suit the occasion need not be a complicated affair.

Nor is it necessary to sacrifice function when choosing a heel height adjustable foot. Elation is easily adjusted up to 2 inches at the touch of a button, while the foot's progressive stiffening feature adapts automatically to the load applied, ensuring a comfortable, steady gait.

User Information	
Amputation Level:	Transfemoral and Transtibial
